February 3<sup>rd</sup>  
10:00-11:30  
ECT  
2023

Pan-European Community of Practice  
Recommendations for complementary  
standardisation in digitalisation

## Pan-EU CoP meeting INVITATION

The IM-SAFE consortium cordially invites you to join the interactive online Pan-European Forum on **'Recommendations for complementary standardisation in digitalisation'**.

The H2020 CSA IM-SAFE project is paving the road towards the improvement of maintenance policies for the European transport infrastructure. The main goal of this project is to support the preparation of the mandate for CEN for new standards in monitoring, data-informed safety evaluation, risk evaluation and maintenance decision making for the transport infrastructure

For the members of the Pan-European IM-SAFE Community of Practice we will hold on the 3th of February an **online** workshop dedicated to the **IM-SAFE recommendations for complementary standardisation in digitalization**.

During the online CoP meeting, the participants will also be given the opportunity to engage in a discussion about the needs for and benefits of standardisation in digitalization aiming to improve the safety management of the transport infrastructure through data-informed decision-making enabled by new and harmonized European standards.

Please find the schedule on the second page of this leaflet. Participation is free-of-charge, but registration is required. Questions or input beforehand can be shared at the online registration form.

If you have any further questions, please contact us via [info@im-safe-project.eu](mailto:info@im-safe-project.eu)

On behalf of the IM-SAFE consortium,  
Dr. Ir. Diego Allaix (TNO) – PAN EU CoP meeting Chair  
Dr. Ir. Agnieszka Bigaj van Vliet (TNO) – IM-SAFE project coordinator.

standardisation in digitalisation

## Pan-EU CoP meeting **SCHEDULE**

### 10:00-10:05 Welcome

*Agnieszka Bigaj van Vliet* TNO – The Netherlands

### 10:05-10:30 IM-SAFE proposal for new standardization on monitoring, data-informed safety assessment and maintenance of the transport infrastructure

*Presented by: Diego Allaix*  
TNO – The Netherlands

Participants to the workshop will receive up-to-date information about the proposal drafted by the IM-SAFE consortium for the scope and content of the future European standards.

### 10:30-10:50 Session 1: Summary and conclusions from WP4: Digitalisation as enabling technology

*Presented by: Matthias Weise*  
AEC3 – Germany

Work package 4 of the IM-SAFE project covered several topics related to the use of digitalisation in context of monitoring and predictive maintenance use cases. This session gives a summary of findings being used as input to propose further action items and next steps in complementary standardisation.

### 10:50-11:10 Session 2: Recommendations for further complementary standardisation in digitalisation in construction

*Presented by: Michel Böhms*  
TNO – The Netherlands

This session provides a list of action items and recommendations that will be given to the EC to complement the proposals presented in the introduction. Beside relevant ICT standardization bodies with their standards a roadmap with next steps and expected benefits will be presented.

### 11:10-11:30 Q&A of participants
